

Universal Call Points (Wet Area)

Indigo Care has produced an Australian designed set of Universal Call Plates for Wet Area, that are backward compatible to most Nurse Call System that conform to AS3811. The call plates are for WET areas and use an EPOXY RESIN, ensuring a rating of IP67. These Call Plates are designed with the elderly patients in mind as our call points feature large easily identified colour coded buttons that are easy to press. The soft feel silicon buttons have a low brightness backlight which makes them visible during the day or night. Once activated by a resident or staff the backlight goes to full brightness and acts as a reassurance light indicating the point is active.

Part Number:

- Momentary, no jack socket MED-UCP/WETV1-X
- Latching, no jack socket MED-UCP/WETV2-X

X denotes:

C = CALL Button

A = ASSIST Button

E = EMERGENCY Button

Key Specifications:

- Australian Design
- C-Tick Approved
- Anti-Bacterial Silicon Buttons
- Raised & Easy to Press Buttons
- Tactile Mechanical Switch with Silicon Button Actuator
