

Gen 2 Call Point (Wet Area-Latching Version)

Indigo Care's Gen 2 Universal Call Plates are a new contemporary Australian design and are backward compatible to most facilities using a Nurse Call System that conforms to AS3811. The call plates are for WET areas and use an EPOXY RESIN, ensuring a rating of IP67. They are available with 2 buttons, having an aesthetic appeal and a natural depth which make them easier to see. These Call Plates are designed with the elderly patients in mind as our call points feature large easily identified colour coded buttons that are easy to press. The soft visually pleasing buttons have a low brightness backlight which makes them visible during the day or night. Once activated by a resident or staff the backlight goes to full brightness and acts as a reassurance light indicating the point is active.

Wiring Diagram is available upon request only.

Part Number:

➤ Latching, no jack socket MED-GCP/WETV2.1-X

X denotes:

C/C = CALL Button

A/C= ASSIST Button

E/C = EMERGENCY Button

Key Specifications:
