Indigo Care provides a pressure sensitive Cordless Chair Sensor Mat that is designed to immediately alert staff when a resident leaves their chair.

The transmitter has an exclusive ID encoded RF Transmitter that communicates with the Wireless Receiver (RRU) or Dual Function Universal Call Point (UCPV5.1). It allows the RJ11 Chair Sensor Mat to wirelessly transmit an alarm to the call point. Simply connect the Transmitter to the chair sensor mat and program the RJ11 Transmitter to the Receiver (RRU) by following the instructions printed on the Receiver box. The sensor mat will now trigger the call point when activated within the transmitting area. It is easily integrated to most nurse call systems.

(Note: RJ11 Transmitter and Chair mat can be ordered separately)
