EFFECTIVE

# DUAL PIR ALARM MOTION SENSOR

Requires: 2 x PIR Motion Sensor and 1 x V-Lead

## PRODUCT CODE:

MED-MS-02P-6T(X)KIT – Wired PIR with 9V Power Pack – includes lead

MED-MS-02B-6T(X)KIT – Wired PIR with 9V Battery – includes lead

MED-V-LEAD – V Lead – 2 Female sockets, 6.3mm

Indigo Care's PIR Motion Sensors detect movement using a narrow curtain beam. When a resident crosses the beam, staff are alerted through the nurse call system. For a more comprehensive setup, the **Dual PIR Alarm Motion Sensor Kit** offers sensors for both sides of the bed. This kit can also function as an Out of Chair or Room Entry/Exit sensor.

Installation is simple: **choose two PIR Motion Sensors** (available with either a power adaptor or battery) and connect them to a **V Lead** that suits your nurse call system. The sensors can be mounted on the wall using the included bracket and swivel arm, allowing for 360-degree rotation. Alternatively, place the sensors on either side of the bed.

The unit features a separate ON/OFF switch to prevent false triggers and for manual activation when needed. The motion sensors are powered by a 9V power pack or battery and include a 3-meter cable with a 6.3mm mono jack to connect to the nurse call system.

### KEY SPECIFICATIONS:

- Nurse Call, DC Output & Battery Compartment
- 3 metre cable with 6.3mm Mono Jack Plug
- Power On/Off Switch
- Horizontal Beam Angle: 6 Degrees, Narrow Beam
- Warranty: 1 year
