

Air Pendant

MED-NC1B/APT2 (Mono)

The Air Pendant developed by Indigo Care is specially designed for elderly residents with limited or no mobility, making it simple to call for help when needed. Its advanced pneumatic activation, combined with an ultra-soft air-pillow grip, allows residents—even those with reduced strength, dexterity, or arthritis—to trigger it effortlessly. Activation is as easy as slipping the air pendant under the hand, arm, or wrist.

Supplied with a 2.3-metre cable and weighing 144 grams, the Anti-Microbial Silicon Air Pendant connects seamlessly to most nurse call systems via a fully moulded, industry-standard 6.3mm mono jack. It can be securely clipped to bedding or clothing, ensuring it is always within easy reach.

The Air Pendant delivers a premium aesthetic without compromising durability. Lightweight yet robust, its elegant milky-white finish enhances confidence and independence, while IP65 protection allows effortless cleaning with warm water and detergent (not suitable for submersion).

- ❖ **Key Specification & Features:**
